- J. Brief description of project:**
- Architectural and Engineering Services for Master Plan of Date Palm Island Project, Palm Island will be built on land reclaimed from the sea resembling the shape of a Date Palm Tree that will be visible from the moon, in the latest addition to Dubai's architectural landmarks. It will include 2,000 villas, up to 40 luxury hotels, shopping complexes, sport facilities, cinemas and the Middle East's first marine park. The Island will be built in the shape of 17 huge fronds surrounded by 12 kilometers (7.5 miles) of protective barrier reefs, extending five kilometers (three miles) into the sea south of Dubai city and adding 120 kilometers (75 miles) of sandy beaches. They will be accessible by 300-metre (990-foot) bridges from the mainland or boat to two marinas, while the main causeway will also have a monorail system.
